

STC to Exhibit at MD&M West (12/5/2005)

The 2006 Medical Design & Manufacturing West tradeshow will be held January 30 – February 2 in Anaheim, California. This will be our 4th MDM West tradeshow, providing us an opportunity to meet with existing customers and new prospects to discuss our tubing and new product designs.

Our tubing's mechanical properties, tolerances, surface finish, heat chemistry, etc. are important features to our customers, both current and future. If you have a project where specialty tubing is essential, visit us at Booth No. 1992. Metallurgists and other technical resources will be there to answer any questions you may have about our capabilities and experience.

Allow us to use our 70 + years of experience in working with you on specialty tubing needs.
