

Superior Tube's John Reinhart to chair TPA/EDTR's Cold Draw Video Committee (2/15/2007)

The committee will produce a series of three educational videos on the subject of cold drawing ferrous and non-ferrous tubing. The series will begin with the history of drawing tubes, applications, fundamentals of drawing (material, tooling, lubricant), drawing equipment, and proceed outward to include most pre-draw/post-draw finishing operations.

The first video of the series is schedule for completion in the Fall of 2007.

Superior Tube Company will participate in the production of each video.
