STCI's David Schaeffer completes a decade of service on ASTM Subcommittee (6-2-09)

David Schaeffer begins second decade of service on ASTM's Subcommittee F.04.12, Metallurgical Materials for Medical Devices. Since joining this subcommittee in 1999 David serves with other representatives from metallic materials suppliers, medical implant manufacturers, and interested third parties such as University Biomedical Research Centers and FDA.

The subcommittee's work is focused on writing and updating specifications for metallic materials for use in medical implants such as coronary and endovascular stents, as well as many orthopedic applications.
